

DOPAI-NFT (white paper)

DOPAI-NFT White Paper

DOPAI Vision: At present, the global market of NFT is led by the boring ape. Although it has created a high-value brand trademark, it cannot get rid of the hype. Our technology creates limited NFT products by upgrading NFT, and will load the metaverse and WEB3.0 in the future. The payment generated by the use in various application ecosystems can also realize the value brought by the real WEB3.0, and promote users to obtain the dividend value for a long time and permanently own the project copyright for a long time. DOPAI project introduction: DOPAI is a comprehensive digital commodity sales platform developed by the NFT metaverse and WEB3.0 ecological projects. In the early trading platform, we will sell a large number of works by world-renowned artists and various types of artists. Three-dimensional NFT digital products and Three-dimensional NFT character images, etc., will pave the way for the later development of the Metaverse project. After users purchase NFT products, they will be directly added to the Metaverse and web3.0 project ecology in the later stage as part of the project in the Metaverse and web3.0 ecology In the Metaverse, the unique features are shown to users. The

Metaverse project includes social entertainment, games, medical treatment, etc. In the Metaverse, users can enjoy scenes such as buying land, building a house and decorating, and communicate with relatives and friends in the Metaverse through interactive actions, voice chat and other methods. To achieve a real sense of immersion, of course, we can also sing and entertain with friends and family through virtual karaoke and other scenes in the metaverse, play card games, NFT series mutual transactions, virtual character mall shopping, virtual cinema watching, large-scale social gatherings A series of livelihood activities such as exhibitions, and when users are sick, they can also conduct diagnosis and treatment activities through the Metaverse, etc. Development

Roadmap:
